

BEANIE BABY IN A BAG

Supplies

Plastic bag
(snack or sandwich size)
Cotton balls
Dry beans
Cup of water

Activity

Open plastic bag and place damp cotton in the bottom of the bag. Place 2-5 seeds on the cotton balls depending on the size of the bag. Seal bag and watch your seeds grow! You do not need to open the bag to water it, the sealed bag will keep the water inside.

Making connections

You can place your seeds in a sunny window or under a bed or both!

Once your seeds have sprouted plant them outside and watch them continue to grow.

Make a seed journal and draw and write about your seeds each day.
